

To: All Bidders
Micro-Isolator Mouse Cages with non-Motorized Exhaust Ventilated Steel Racks
Proposal # P06-123

Subject: Addendum 1

Date: April 28, 2006

1. The Following response is to an e-mail received from a bidder.

Q: I had a question pertaining to IFB #P06-123 section 7.2 Reference Information. It states specifically that we need to "supply at least 10 publications in peer reviewed in which a system was used for live animal imaging in the cancer research field". If 10 such documents can't be supplied will this exclude a bidder from this RFP?

A: This is an error in the IFB. The 10 publications in peer reviewed journals on live animal imaging was for the Live animal imaging system IFB. The cages are not used for live animal imaging, so this would not apply at all..

END OF ADDENDUM #1
