

The UNIVERSITY HOSPITAL
University of Medicine & Dentistry of New Jersey

We Believe:

The more you know about your health, the better.

We Want You to Ask:

Your doctor, nurse, pharmacist or therapist questions about your health.

Ask them to tell you in plain language:

- 1. What is my main problem?**
- 2. What do I need to do?**
- 3. Why is it important for me to do this?**

Don't Be Afraid, Keep Asking Questions:

If our answers are not clear or we use words that are too medical, ask again.

We Want You to Understand:

Because we care about your health.
